Erratum

Erratum to “Modeling the dynamics of oxygen consumption upon riverbank filtration by a stochastic–convective approach” [J. Hydrol. 505 (2013) 352–363]

Samuel Diem ^{a,b,*}, Olaf A. Cirpka ^c, Mario Schirmer ^{a,b}^a Eawag, Swiss Federal Institute of Aquatic Science and Technology, Überlandstrasse 133, 8600 Dübendorf, Switzerland^b University of Neuchâtel, Centre for Hydrogeology and Geothermics, Rue Emile-Argand 11, 2000 Neuchâtel, Switzerland^c University of Tübingen, Center for Applied Geoscience, Hölderlinstr. 12, 72074 Tübingen, Germany

The authors would like to state the following corrections to the already published article:

The temperature factor (defined in Eq. (6)) should be denoted as f_T and not f_τ throughout the paper.

In Eq. (8), the half-saturation constant (K_S) should be written as capital letter as follows.

$$k(S) = k_{\max} \frac{S}{K_S + S} \quad (8)$$

In Eq. (11), the equal sign was missing and should be placed as follows.

$$EC_{out}(t) = \int_0^{\tau_{\max}} g(\tau) EC_{in}(t - \tau) d\tau + c \quad (11)$$

Elsevier regrets for any inconvenience caused by the typesetting errors contained in the original article and hopes that the publication of these corrections helps to avoid confusion.
