Corrigendum

Corrigendum to 'Recent advances in flame retardant epoxy systems containing non-reactive DOPO based phosphorus additives' [Polymer Degradation and Stability Volume 200, June 2022, 109962][☆]

In the original article, there was a mistake in Scheme 5 as published. Two of the silicon atoms in the organic/inorganic flame retardant compound, obtained by sol-gel process, showed incorrect bonded groups. In particular, Si(H)₂ in the chemical structure have been replaced with Si(OH)₂ and bridging Si-O-Si. The original article has been

updated and the corrected Scheme 5 appears below.

The authors regret this mistake and state that this does not change the scientific conclusions of the review in any way.

The authors would like to apologise for any inconvenience caused.
