In Section 2.5, The maximum root reinforcement  $RR_{max}$  was calculated using the following formula implemented in the SlideforNET model [14,15]. Equations (20) and (21) should be changed from:

$$RR_{max}(DBH, d) = a \cdot DBH \cdot \Gamma\left(\frac{d}{DBH \cdot 18.5}, b, c\right) \text{ for } d < 18.5 \quad (20)$$

$$RR_{max}(DBH, d) = 0 \text{ for } d > 18.5 \quad (21)$$

to

$$RR_{max}(DBH, d) = a \cdot DBH \cdot \Gamma\left(\frac{d}{DBH \cdot 18.5}, b, c\right) \text{ for } d < DBH \cdot 18.5 \quad (20)$$

$$RR_{max}(DBH, d) = 0 \text{ for } d > DBH \cdot 18.5 \quad (21)$$

The authors apologize for any inconvenience caused and state that the scientific conclusions are unaffected. The original publication has also been updated.
